proper heritage status that the former Leroy Keeley singer deserves. Sucker, Jonas Brothers Jonas Brothers, never left the culture ceremony; Nick and Joe go on to make solo music (and keep trending following their relationship with other mega-famous celebrities). What Pop didn't know, however, was that he would have to inject a resurrected family trio once again in 2019. Rather than catching up with 00s pop rock, Zobros would most likely have landed if he had made genre-defying pop and eventually kept the band. It's freely and tastefully (p) optimistic, happy to start one of the most fun lead single suckers in the Hot 100 this year. It's been almost 10 years since you're home to a carefully crafted boy band, so it's about time you surrender to the bass line and swoon over Nick's falsetto mixed with that synth. Forgive me Jesus, I am a tote, JPEGMAFIA ... And the best song title of the year goes to JPEGMAFIA. It's not just praise for the experimental alt-rapper's track. Like the artist's experience of moving to LA after a military deployment in Baltimore, his sound cannot be fixed across borders - and forgive Jesus... They are as open as they come. Through majestic synths and pianos, he is waving between proud prayers about his success and the future of humanity. It sounds like his frantic fusion, pushing the genre, and you can't think of that sound of glass breaking into the track how he shatters expectations about how music can sound. For this song he put my soul in every bar, and all And all rhymes- that Amen! Hope is a dangerous thing for a woman like me, but I have itAnna Del Rey knows that loneliness-stricken Lana Del Rey may seem like no one understands her other than the literary icon she prays for, but in reality the composer reflects on the timeless experience of a depressed modern woman. Sofia Coppola films or Sylvia Plath's writings (the latter name fell on the track), like the subject of her Norman rock and roll! It's a tribute to this side of the album Closer Girl and the satisfying and touching woman who yearns for more life. But as sombre as a self-referr piano ballad is, she hopes this indifference won't last forever, and as desperate as she sounds, you believe her. In short, this is the pinnacle Lana Del Rey, and that's a beautiful thing. Because of the Old Town Road-remix, Lil Nas X (feat Billy Ray Cyrus) giddy-yeh agenda said, the town is not big enough for the two of us and proceeds to take over the culture this year. And the Sound cloud rapper's breakout track is set to major label signature Lil Nas X, which is the soundtrack to the internet nickname yeessaw agenda. The rap/country track may have sparked controversy after Billboard removed it from the country charts, but that prompted country mainstream Billy Ray Cyrus to offer help in several passages, and also flatly provoked the internet to lend its support to the song, making it blown up sex. This difficult bass is made for outlaws, has certified hooks and, with cheeky Western lyrics, the Old Town Road has to be played as it descends straight from the ranch. Free Uji, Lil Ujji Butley Ledge Butt is free! The 24-year-old Imokor rapper started the year by declaring his retirement after clashing with his previous label, but has returned during his 1980s with "Free OoJ" after signing with Jay-Z's Rock Nation. The track reminds listeners how to light a fire that doesn't stop young talent from burning, and his delivery reminds them of when it's too fast to catch up with his growling verses. Muted productions are only supplied to the level he is at. Free Uji is right because it's a crime not to hear more from young rappers who make the genre temptingly dark. Juice, Rizzo self-love anthem is a constant of pop music... This year, however, no one was as self-loved as Rizzo. In Juice, the hip-hop artist blatantly touts how amazing she is, and gives her every reason to believe she's telling the truth. On a nostalgic and soulful punk beat, her track returns to its most indulgent era with '70s styling, informing the decadent and persuading you too. Like Rizzo, he left the boys in the DM, looked in the mirror, collapsed for a woman and paraded her on the dance floor. I'm not a snack at all, baby, I am a full and with such quips she may well inspire this kind of confidence in all of us. burning Rogers&Magi Rogers seems to have wanted to reclaim his story with his debut album Hear It In a Past Life, a folk-pop phenom that has appeared in the ether with viral success over the past three years. Her name has stuck to Farrell's name since she played a recording artist at an NYU workshop in 2016, and he adopted her as a mentor. But in lyrics such as 21st Century Stevie Nicks, a singer who dances with the universe and does electronic productions with ears for streaming success should be heard as his own. In Burning she is burned. The backtrack of the delightful percussion feels ready for the festival finale sound, but rogers' awakening from her conscious state of life sounds like the bright name of pop in Rogers' delightful delivery. In burning she put out the flame, and you will feel it too. Late night emotions, Mark Ronson (feat. Lykke Li) has shifted in recent years to focus on sad banger as a handful of pop artists turn their eyes to bubblegum music. It may sound like an oxymoron, but there's no better term for a track with heartbreaking lyrics about everything that sounds like bob and cries in a club. It would set mark Ronson and his fleet of co-writers/vocalists for late night emotions. While the composer/producer may not seem to cry with his recent tribute to being shallow with Lady Gaga, here he provides a melodrama that feels disgraceful and sad about the love lost with simple sage pop sentiment and glowing productions. The title track shows the mood of the album, which shows the heart aches as the clock approaches midnight and the leverage for our actions. If you dance to this song in your room alone after dinner, you may feel regretful in the morning. Cathy Poop, Megan Te Stallion (Feat. Dababy) When Houston rapper Megan Te Stallion sponges through this verse, you'll have to take your place later; Her confident, sexually charged lyrics and delivery are powerful in that. Reclaiming what it means to be Texas and taking away explicit ownership, the artist was pushed into the mainstream of her debut album Fever, and her empowerment of hot girls is something everyone can get behind. The album track Cash is the culmination of a daring delivery knowing she deserves all the finer things in life, and the deep bass hypes her up even more. That's exactly what that real hot girl is all about. Hot Girl Summer, Megan Te Stallion (feat Nicki Minaj, Ty Dolla Sign) Megan Te Stallion literally dominated the entire season by reclaiming and pioneering (which has since become a social media phenomenon co-chosen by the brand) Hot Girl Summer. After posting extensively about what hot girl summer means (living like a dress, stakes you want doesn't matter, and what it feels like right, leaving a man to read or be sending that widestet her own), she finally The erudition single that has plagued all season and defines movement. The chilled and carefree Ty Dolla Sign hook for a song, but the real treats come in the form of Meg and Nicki Minaj's alternating, satisfyingly explicit bars. The soundtrack to "Summer" 19 and how hot the track can get when artists squash unnecessary trophies that female rappers have to deal with each other. Her mother's daughter, Miley Cyrus&Miley Cyrus, is a hard-to-pin pop star. The Nashville girl gained fame for portraying Hannah Montana, which accidentally clouded her identity and tastes - one blurred by the king of the countryside and her love of pop and hip-hop. Her release jumped from hip-hop to rock experimentation, and in 2019 she created music that explained all her iterations. The mother's daughter is the singer's rock opus. She declares how strong a woman she is, the emotions drilled into her by her mother, even if it means she is defiant and a little nasty. A rap production produced by frequent collaborator Mike Will Made It can streamline the track, but with her wild singing, it's a 2019 version of the radio rock anthem. It'll be fine, baby, if a close album from MUNAThe album indie pop group MUNA's Records saved the world if there was a sequel to Lady Bird and it sounds like if it came in the form of a song. That's to say that moving to New York, cutting your hair with boring scissors, dancing to lcd soundsystem at parties, and age-riding stories will return to your own experiences, and feel a sense of relief inside. The LA three-piece produces serious, bizarre pop music, and it's all about a lifelong journey that grows beyond trauma like the whole album is okay, baby will be. If you heard this the first time you left home, there's no doubt that you won't feel like everything is going to be ok. With his debut album Miss Universe, London-based singer-songwriter Nilüfer Yanya has taken on the role of mental health phone operator. A classically trained musician and passionately pursued by the industry, Yanya introduces himself as a hotline for the fictional WWAY HEALTH, which begins semi-concept albums and cares for the deepest challenges. But her way of becoming an acceptance therapist is to reveal her own scattered anxieties, such as her first official album track, In Your Head. With his excited pop rock and sparkling electric guitar, Yanya worries that his feelings will be out of control, not just projection. This is what makes up-and-coming pop singer Miss Universe - we sense and identify all of her hysteria. Win. Song 32 NonameIn her music, you can hear how Chicago rapper Noname draws heavily in her background at the slam. In Song32, she writes a clear and physical expression and pays homage to her appearance by exclaiming that she has begun to receive money for using haiku. The record artist has long been a regular in Chicago and worked with Chance the Rapper before recording his winning album Room 25 last year. With each launch, Noname is rapidly rising to the best title on the lap. The track, in particular, follows a cold jazz rhythm influenced by a bit of reggae, but her lyrics about colonialism and her personal journey to success truly stand out. After the song builds, she repeats the line that I am America at my best, and I will be a fool who doesn't believe her. Motivation, when normani boy bands and girl groups break up, Remnant's Justin and Beyoncé reveal themselves when they eventually have more success than they did as part of the band. Camila Cabello may have left Fifth Harmony before the pop outfit officially went on hiatus (and she's certainly doing well for herself), but when Normani dropped her motivation she made a convincing case that she was the true star of the group. The romantic numbers, inspired by the Y2K music she grew up with, are part of bubblegum pop, and R&M&P;B on the styling of Destiny's Child and Ciara Grant a portion of B. It seems happy and nostalgic, and you can hear normani motivated to be the next big pop star. It can be a long journey to feel worthy and deserve to be loved by the Paleohounds. It's something Boston's Ellen Kempner, who makes music as a paleohound, recognizes the pain of unreasonable thinking through the most earnest of means at this year's Black Friday. The Lofi artist does what she does best in her songs, her Elliot Smith-esque mutters, and her alt-country guitar plays the perfect relay for this form of reflection. She may sing about cruelty, but she recognizes that, in a poetry way, she will one day convince her to feel love suicide. Pop Out (Feat Lil Tjay), Polo G We Come From Poverty, Man, We Don't Have a Ty, Chicago rapper Polo G raps on his mega-hit Pop Out. It is full of violent and dark revelations about his life of crime, but rather than saying as if he had left them in the past, it is a fact of how they made him an artist. A dense but melodic party track, combined with its history as a fast-spitting drill-style rapper, the song was a clear winner, but the fact that the lyric content has stripped away from mainstream rap speaks to what makes it a particularly special hit. Heavy Heavy, the forming squad sucks. It weighs unbearable, in more ways than one -- but no matter how difficult the fight, the Brooklyn-based trio The band form firm squad is here first to recognize the validity of feeling empty, then tread down your throat with full force. The band, led by Mia Vereen, has been consistent in the Brooklyn indie scene over the past few years, playing nonstop shows and shedding tears at fans with their vulnerable, whipping funk. Heavy Heavy finds Berin struggling to cope (it's heavy to tell everyone I'm ok), and her guitar and vocals spiral out of control to reflect her inner self-loathing. The track is wrapped in the messiness of femininity and how painful it is to rationalize grief as a woman, but the boy packs a punch. The lure of Kansas, Priest said that after the 2016 election, a handful of mainstream media outlets responded to the results by starting a series of stories exploring the plight and needs of conservative Middle America. Rock band priests did the same for their own record, The Temptations of Kansas. The DC-based band grew up in punk and still maintain this political attitude in their work, but they have a tolerance for art rock that can be heard jovial in the album title track. Built on eerie disco elements and singing cultural references sneering by vocalist Katie Alice Greer, the song is a camp attack on the heartland. This is the music of resistance that needs to be remembered. Lauren (Track 2), Prince Daddy and Hyena Albany-based Party Punk Prince Daddy and Hyenas made their rounds in the East Coast Emo scene, playing crazy gigs in a friend's basement and DIY space. But what they really like is being propelled into space, leaving an excuse for reality. This is the mentality that fuels post-teen existential crisis/estyness. The lead single Lauren (2 track) is best captured, childish and empathetic, and not entirely void of positivity. The song follows frontman Corey Gregory's harsh howls complaining about how annoying the world is to you, how annoying it is when you let it rot in the summer, and how lonely you are by yourself. But the lively crap of Gregory and the group is that as long as you have a dear person close by, this world doesn't have to be one to make a quick exit. Sugar Honey Iced Tea (S.H.I.T), Princess NokiaYe can remember a video in 2017 of a woman throwing soup at a man who was shouting racist slurs on the New York subway. If you're into rap, you can also remember the woman behind The Hero Soup Throw was Brooklyn-based rapper Princess Nokia, who identified once fans and blogs exploded on Twitter. In the 2019 single, a soulful horn-filled number, the artist solves the case and explores her activism. She is known for angry bars, and even injects hardcore/pop punk To her music, but here she sounds a matter of fact, as if to say she stands for justice because she feels compelled, not for notoriety. She sees I hate domestic abuse, I'm on a train throwing soup / Racist men are making threats / I'm not a gangster but I can tell you love to throw your hands at racists, bigots, crap. She knows someone has to stand up for her woman and strangers on the train, so that person might be hers. Kids, puppies Toronto punk puppies didn't get over teen-adr instead, the four-man band, who have released solid punk albums since 2013, continue to get angry as they get older. In the Mobid Stuffoff lead single, frontman Stefan Babcock, like children, I've worked through the mind-numbing reality of a godless being. He seems to have settled on an attitude at the age of 16, and he seems to have decided that it suits the music pup makes. Reverb and raucous drums create a chaotic, frenetic tone throughout the track. But no matter how crank and pent their guitar sound, it's a damn good time. In children it is about finding someone as angry as you (I don't care about you) - an experience that is demoterly less terrible than swallowing in isolation. It stings, but there is joy here, too. Hatin, Rico Nasty, Kenny BeatsDC rapper Rico Nasty know she's an icon of rise - her aggressive and sweet rap and bold energy are too big to keep down. Shortly after last year's excellent major label debut NastY Announcement, the recording artist returned with another mixtape, Anger Management, this time a frequent partner who lent his talents to acts like JPEGMAFIA and Vince Staples, and a collaboration with trending producer Kenny Beats. Her vocal prowess and female anger shine, especially on Hatin, a track that samples dust from JAY-Z's shoulders. Her signature raff is more overwhelming than ever, and she even cheerfully flips the chorus of the sample, spitting to go if she feels like a boss. No one will hold her to the top. Millionaria, Rosalia will give you a few years and Rosalia will be one of the biggest pop stars in the world. The Spanish star's flip flamenco track Milionaria, apart from her double EP Money Man, is the first written on her Barcelona home tongue in Catalonia, and it hits a great seething. The translation sees dollar signs and the finer things of life in the singer's mind, but even as she rises to pop dominance, there is cynicism in her tone over upbeat songs. money, man, she boasted among the dreams of making rain. The catch of the song reflects the infection that is capitalism. A constant friend, SamiaIt is often a self-destructive habit that women have: measuring their self-esteem based on their relationship with men or their sexual history. Some women have ownership of their choices, but also they should, for others it's more complicated, like something to make light Mask. Brooklyn-based singer-songwriter Samia stands somewhere between the two, with lyrics by Liz Phair-ish in the '90s, about how to get boys to touch their breasts at a middle school lunch. The song is just one of the anthems of up-and-coming artists. She has brought energy to the Brooklyn rock scene with her energetic, witty personality and poetry. But here alone, you can tell she's the one to remember, as her fierce position herself to be one of tomorrow's next great composers. Gretel (Sandy) Alex G bedroom Recording Artist - Set indie home (Sandy) Alex G is a storyteller. You can rely on his music to project his calculations on the characters he recorded in his story, and find solace in them. After all, it's only natural for the composer to turn into one of the most famous folk works, the fairy tale of the Brothers Grimm, for inspiration. The first single from his lovely Sugar House, Gretel now reconstructs the story as a means to fight for his happiness. The instrumental introduction sounds like the escape of the title character from the enchanting candy house, but after all the warm guitars and repeated lines, I don't want to go back! Nobody's going to track me down, you come from the woods and you're with a storybook that ends up writing for yourself. Free, SASAMIYYYY you may not know her name yet, but you've heard SASAMI before. The L.A.-based multi-instrumentalist's work is all over the record of contemporary indie staples such as Cherry Glazerr, Bagavand and Wild Notts, but now is the time for his synth-wielding, dreamy pop debut. SASAMI FINDS HER POWER WITH GENTLENESS IN A SONIC MOMENT THAT CAN BE OVERLOOKED, BUT INSTEAD IT'S IN THE TENDERNESS OF A SONG THAT STRIKES LIKE LIGHTNING AND HER VOICE CRUMBLES. Her debut album, Free (featuring composer Devendra Barnhart's Harmony), may sound simple and quiet, but it weighs in like a guitar moment that resonated with the death of her relationship with the lyrics. And as solemnly smooth as the track seems, SASAMI proves that sometimes things have to end so that we feel free: Ultimately, she rings with peace. My type, SawetieSawetie extravaganza (and forward) is exactly why other cases -- L.A. rapper-to-watch are already bosses. She exploded in a few years with Instagram freestyle, dropped the luxury breakout ICY GRIL from Soundcloud, and this year revealed exactly what the hip-hop princess wanted and deserved with My Type. The fast track features eight characters, eight inches, a Lamborghini key, and a fundamental beat, depicting the best type of cash and class: a man of her type. It's hilariously spare, she flips a man who objectifies a woman to music in the head as she even set the bar of standards for anyone looking her way. You know what she can get after (even if some people deserve her quite a bit). Attack Juice, Schoolboy Q&Schoolboy Q's "Attack Juice" is a fast-paced, energetic track that's a cinematic party. Patience, tame impala stirs produced by the likes of Kanye West and Travis Scott, and Tame Impala frontman Kevin Parker lends his talents back to the psychedelic Australian group that finally started it all for him. First released after Patience in 2015, Patience is as pop-minded as a perfectionist album with mainstream success, and what caught LHanna's attention is now a strange re-entry and attracting worldwide attention. Trading guitars for piano and bongo can imagine tracks lighting up the dance floor on a single cruise, but disco accents are a real joy to give yourself up. Of course, periodically lamenting to you about the passage and weight of time as an artist is what you do when you're a cold Australian group that has become one of the biggest bands in the world, but Parker's original tunes remain in the making of the song, a welcome return of the band. Taylor Swift Swift has wreaked havoc on revealing what turned out to be a flowing love named Archer. First, she released Border MEI to children's music, and she dropped you Have To Calm Down, a kind of flip pant-dis track/political anthem. It's all a very confusing move from one of the most divisive pop stars - but even the non-Swifties should remember that she's one of the best pop songwriters of our time. So, enter Archer, the third single that unfortunately didn't spark as many conversations as her first two... Probably because it's a good thing. Synthpop songs build slowly into a war where Swift prosecutes herself and she's all started or drafted (I love Archer/Who could have left me I was fed? but who could stay?). It may not be the cry of battle or the parting anthem that explodes along the front lines of love, but it feels like her most vulnerable megastar, and will bring back her old compositions that have since become Cannon Swift. The only child, Tierra WhackTierra is one of Whack's (if not more) and now the most innovative name in hip hop. The Philadelphia-raised rapper flips her songs into a kind of alt-pop art, infusing her backing tracks with vibrant, cartoonish qualities. For example, its debut album, Whack World, had a 15-minute visual album Odyssey invited others into an obscure world. This year she dropped her only child, which is interesting and continues to sort her out. Bold names in music; On the track, she stresses that there is no time for those who only have songs that sing smartly about the inherited cold of people who think but think. Like a young child, twisted keys, and the lyricity of beatings and her artistic voice gleaming, and even as she put you in your place, through the deprived production of Tierra Beats, Tierra Beating is a treat you can always hear. Glad he's gone, Tove Rothweden pop singer Tove Lo has launched a reputation as her 2014 hit Habit (High Stay). Where many pop acts today deliver increasingly inexorable and brutally honest music, it has always been Tove Lo's second nature. She placed her after-parting depressive episode for you, as she excitedly cheered on the need for a quick and casual hook-up. Its duality persisted in sunshine kitty with songs like Cold Tropical Glad He's Gone. The beat shakes when she says a joke to her friend and says fuck you to fuck boy. It's an un filtered, sunny attitude and sounds to cheer you up like a girlfriend she's comforting. After a five-year break in this life, Vampire Weekend and a lot of speculation, Vampire Weekend is finally back (Sans founding member Rostam Batmanglij) with the bride's excellent double record father. The album is full of certified bubs going back to the innocent days when they first fell into the band, but this Life encapsulates the group in its heyday. At first the song holds the same acoustic acoustic vocabulary of a Van Morrison song with the resonant sound of a Brown-eye girl, though it dances with duality: the kind of Baroque tune you'd expect on a vampire weekend while exploring the unfortunate simplicity of the relationship that runs the course... And life does the same. It's hilarious, cynical, witty and self-criticism frontman Ezra Koenig is doing his best. While the band may dip into fans of mortality and the hysteria of spending time through their albums, another truth of this life is that vampire weekends are forever comforting. In the spring of 2017, after L.A.-based indie rock band Wallow shared their first single Pleaser, Are You Still Bored?, Wallow (feat Actor Dylan Minnette, who starred in the talk-good Netflix series 13 Reasons Why, not only had he just dropped ahead of the band and Season 1, but the group influenced by guitar tones and surf rock in the '60s was really good. A band of three childhood friends finally announced the first full length of the year nothing happened, and it was worth the wait. Bored yet? It is a sure earworm. The SoCal group has long been influenced by young romantics such as the 80s new wave sound and John Hughes, all of which tell the track. The drum machine with its natural keys sounds like a song can supply the airwaves, especially around 86 years, and nothing has ever sounded too typical to soundtrack a scene of high school dance than a bedroom pop artist The duet begins. It feels like the moment you fall out of the theater on that synth and the last big screen kiss to clean your feet with a violin. The film is like an untouchable celestial body in its own right, because it means that what we saw when we were small is meant to bring you to Earth through a comprehensive reality check that it's just a novel. Weyes Blood has been indie/folk's favorite act for quite some time, but this is her Oscar-winning score. It may be right. White Sapperkentucky's White Sassin probably grew up listening to Van Gallen, Ramon, Thin Ridge, and many of the other power-pop rock bands. Dubbed the world's best American band for their 2017 album, the group is soaked in the nostalgia of stadium rock, creating a whole new sound with a kind of sexy s' dirt and witty fun. This year, they refined the sound as if they were greased with engines to fill the throttle, creating the only golden example of music that deserves to use the midnight parking lot. Perhaps it's right. Whitney's alt-country band Whitney dropped their jaws on their debut in 2016 and made a heart of well-being as they turned the year's forever. Their sound is so lovely. In a new record used to be lonely, as well as seeing the lovely, loneliness, how liberating it is to sink. At first, there is a trace in the voice of drummer/vocalist Julie Erlich, who seems wary of saying the end of the lonely, but the layered composition grows into horns, piano and guitar, and there is no room for isolation here. At the heart of the song is an acoustic guitar that recalls a man improvising a song while sitting around a bonfire, before growing into a full jam session. Just as Whitney is about to inspire this friendship, it means the unity that many two-piece bands know best. Hot (feat. guna), fun to imagine how funny young thugs are. Between departing Jet in the front row of Fashion Week around the world, the style icon/rapper has been hitting studios with childish Gambino, Travis Scott, and other top-tier rappers making hits in minutes. He promised to share the fun with the rest of the people making party tracks on his first studio album, So Much Fun, and feat. Gunna) showed off. In his signature slur, he raps about knowing how well he has it (all [lity, I love when it's hot), and that win over a flute like snake charm is enough to shed a trace of life of luxury from listening. If you get the chance to explore the city in a champagne-popping limousine (slow motion), this is the track. Need help finding something Sign up for our weekly Stryamal newsletter to deliver streaming recommendations straight to your inbox. Sadie Bell is an entertainment editorial assistant for Thrillist. She @mssadiebell about the music. @mssadiebell.
